

MYER

GOLD TIER

ONLINE PHOTOGRAPHY GUIDELINES

NOVEMBER 2025

MY STORE

As you may be aware, we currently have three supplier tiers at Myer. These tiers dictate whether an image submitted by you in PEP (Product Enrichment Portal) flows directly to our Enrichment team for audit and publishing, or if they need to undergo an image editing process by our internal team. Suppliers are typically assigned a tier based on how 'Myer Ready' their images are. Factors include quality of an image, alignment to Myer image guidelines, etc.

Based on a review by our Image Management team, we would like to offer you the opportunity of moving up to 'GOLD' tier.
This will provide you with advantages like:

- An expedited enrichment process without the existing two-week turnaround from Image Editing to Enrichment.
- The opportunity for your images to be published with the talent's face, should you have already obtained licencing for it to be used on myer.com.au.
If you prefer to hide the model's face, please ensure you crop the model's face based on pre-existing cropping guidelines, as 'GOLD' images will not undergo our editing process.
- The opportunity to publish your images on a grey background. Please note, images on a grey background need to have a gradient or vignette. Details can be found on page 5 of this document.
If images are on a grey background, they must have a natural gradient or vignette at the corners. This is so the automated system identifies the edges of the image and doesn't incorrectly crop into the subject.

To be upgraded to 'GOLD' tier, you must adhere to the following guidelines:

Minimum Dimensions: 1551px(W) x 2000px(H) (or larger)

Grey background: R230 G230 B230 (including a gradient or vignette)

Correct Cropping (including cropping talent's faces if required)

Aspect Ratio: 7:9

Correct Order of Images

JPEG format - Maximum File Size of 50MB

BACKGROUND COLOUR

- Grey colour should be as neutral as possible, avoiding warmth, coolness or either green or magenta tints. Please white balance images.
- Please refer to chart for examples of the range of greys that would and wouldn't be accepted.
- Backgrounds must have a natural gradient or vignette. Therefore, if products are clipped onto a flat grey background, a faint vignette must be applied in postproduction.

HOW TO APPLY A VIGNETTE IN PHOTOSHOP

- Before you begin this process, ensure the grey background is within the range specified in the previous page.
Note: vignettes **cannot** be applied to transparent backgrounds.

- Ideal background colour:

R230 G230 B230 // HEX: E6E6E6

- Once the above is done, follow the next steps:
- In Photoshop, and with the image open, go to **Filter > Camera Raw Filter**
See image 1
- From there, navigate to the **Optics** panel on the right of the window and **apply a vignette of -20**
See image 2
- Click on **OK**
- Now your image should have a light vignette in the corners.
